Optime Subsea AS is a global industry expert on subsea well access and subsea control systems. We focus on standardized as well as innovative products and systems developments, creating long term relations with our customers. We maintain a vertically integrated portfolio with expertise offering subsea development, design, engineering and analysis, a wide range of subsea products / systems and modular hyperbaric testing vessels, as well as unlimited workshop testing and maintenance services.

As we continue to grow and expand, we are searching for several qualified candidates to further strengthen and develop our global team. Come join our team of extra-ordinary professionals who are committed to provide work excellence. We can offer an exciting career in an international and creative environment.

About You

Well organized with interpersonal and communication skills, practical understanding, solution oriented, you see opportunity where others see obstacles and are energized by working in an ambitious and rapidly changing environment.

Your mission

- Responsible for mechanical completion of assembly's according to drawings and standards. Such as hydraulics, piping, mechanical build up, el. Termination (machining can occur).
- Responsible for performing qualification and test of mechanical, hydraulic and electronic design according to specifications and test procedures.
- Test and verification of subsea systems and products with customers and third parties.
- Close cooperation with designers, engineers and management.

Key Requirements

- Electromechanical education or relevant background.
- Good cooperative skills.
- Good communication skills in Norwegian and English, both orally and in writing.
- Work travel domestic and international, as well as offshore, must be expected.

Key Personal Qualities

- You are able to work independently, be flexible and solution oriented, as well as in team
- You deliver on-time and are result oriented
- You work structured and maintain good overview
- You are flexible to both work with different customers and different work tasks

If you want to work with an extraordinary team challenged to simplify subsea – we want to hear from you! Please send your application with updated CV, motivational letter, diplomas and relevant certificates to job.application@optimesubsea.com

Optime Subsea emphasis on ensuring diversity in the company by taking into account gender, age and cultural background under recruitment.
