Optime Subsea AS is a global industry expert on subsea well access and subsea control systems. We focus on standardized as well as innovative products and systems developments, creating long term relations with our customers. We maintain a vertically integrated portfolio with expertise offering subsea development, design, engineering and analysis, a wide range of subsea products / systems and modular hyperbaric testing vessels, as well as unlimited workshop testing and maintenance services.

We are currently in search for a Project Manager. Working as a Project Manager within Optime Subsea means you will be responsible for the planning and successful delivery of projects to our international customers. You will be responsible for leading a highly skilled and multi-disciplinary team. A strong focus on collaboration, structure and determination will be crucial for success in the job. As a project manager, it is important that you have good communication skills verbally and in writing. Working at Optime, you will need to be able to lead by example and perform day to day activities required to stay on plan and maintain a satisfied customer throughout the project.

About You

Highly organized with excellent interpersonal and communication skills, you will see opportunity where others see obstacles and be energized by working in an ambiguous environment where things aren't always clear. You will need experience in planning tools and customer oriented focus.

Your mission

The Project Manager will drive the delivery of Engineering, Procurement and Construction projects for clients on time and within budget by planning and organizing resources and people.

Key Requirements

- Higher education required, bachelor is minimum requirement
- Proven track record of delivering and managing high value multi-faceted projects in demanding client facing environments, across multiple sectors
- Good communication skills in Norwegian and English, both orally and in writing
- Experienced in project planning tools, as well as financial budgeting and reporting

Key Personal Qualities

- Reliable and meticulous, bringing gravitas and inspiration as you turn a plan into a process.
- Dependable under pressure, remain results focused and be resolute in delivering client projects on time and in budget.

If you want to work with an extraordinary team challenged to simplify subsea – we want to hear from you! Please send your application with updated CV, motivational letter, diplomas and relevant certificates to job.application@optimesubsea.com

Optime Subsea emphasis on ensuring diversity in the company by taking into account gender, age and cultural background under recruitment.
